

**DATE:**

February 2012

**DESCRIPTION:**

Toyota FJ Cruiser Snorkel

**APPLICATION:**

2010 On Toyota FJ Cruiser

**PART NO. :**

SS420HF

**RETAIL PRICE:**

\$455.27

**AVAILABILITY DATE:**

March 2012

## FOR IMMEDIATE RELEASE

Whether you're playing in the dust or fording a deep river, it makes sense to protect the engine of your investment from foreign matter by fitting a world renowned Safari Snorkel.

The Safari snorkel system for the popular Toyota FJ Cruiser is tough and stylish and has been designed to deliver a huge volume of the coolest and cleanest air possible into the stock air cleaner assembly.

With the variety of engine enhancements that this vehicle will invariably receive by dedicated enthusiasts, Safari took the decision to design a snorkel system that not only exceeded the air flow requirements of the stock engine configuration, but also satisfied the mass air flow demands of modified engines that produce greater than stock horsepower.

Close attention to the internal cross sectional profile and area, air velocity and flow path through each and every point along the entire length of the snorkel system ensures that the greatest air flow is achieved.

Huge air flow is but one aspect of the ultimate in snorkel design. The Safari air ram is designed to perform two very important roles. The most obvious is to funnel cool clean air into the snorkel body - but just as importantly, the Safari air ram acts as a high efficient water separator to remove rain water from the incoming air stream - thus ensuring safe engine operation through even the most torrential tropical storms.

In addition, the detachable Safari air ram can be rotated to any position. This means great peace of mind for those who plan to travel in cold or high altitude conditions where heavy snow falls are anticipated. By rotating the air ram to face away from the prevailing wind/direction of motion, the air ram delivers additional protection from the choking effects of snow build-up inside the air intake

The Safari Snorkel body is manufactured to the highest standards in durable, UV stable, cross linked polyethylene material. In addition, the substantial material wall thickness delivers huge physical strength to ensure that the snorkel breezes through the toughest off-road conditions on the planet.

The Safari Snorkel system is supplied as a complete and comprehensive system that includes every nut, bolt and bracket required for installation - right from robust zero-corrosion stainless steel studs, self-locking nyloc nuts and large diameter anodized body washers through to the tough plastic A-pillar inserts.

## **About ARB**

ARB Corporation Limited is Australia's largest and industry leading manufacturer and distributor of quality, 4WD vehicle accessories, with distribution in more than 100 countries worldwide.

The company manufactures and stocks the world's most respected and sought after brands including ARB Air Locker locking differentials and bumpers; Old Man Emu (OME) customized suspension systems, IPF high performance lighting, and Safari Snorkel systems. ARB's Seattle office is the North, South & Central American headquarters and importer of ARB 4x4 Accessories.
